

2021-03-01

Oroboros Instruments is the driving force in mitochondrial physiology providing high resolution-respirometry instruments and expertise to customers in academic, research and healthcare institutions around the world. Our mission is a commitment to reproducibility through precise quality control, standardization of protocols and nomenclature, and collaboration of scientists in the O2k-Network.

Therefore, we continue to invest in improvements in our own company and maintain the partnership with our customers, suppliers and distributors.

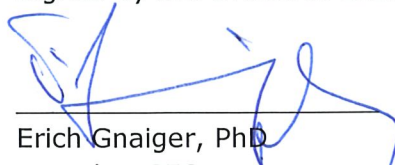

At Oroboros Instruments we continually improve the products and services we provide to recognize and meet our customers' requirements and to produce finished work that we can justifiably be proud of.

We aim to achieve the above with quality management guided by the international standard of good practice BS EN ISO 9001. This includes a commitment to meet the legal and regulatory requirements along with those of our customers, learning from their feedback.

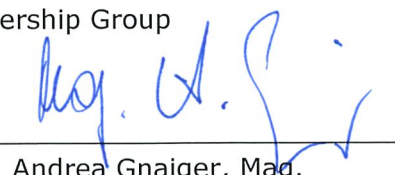

All personnel within the company are responsible for the quality of their work. At Oroboros Instruments we provide training and have established systems to assist all personnel to achieve the standards required. Objectives for individual jobs are to carry out work to the satisfaction of the customer and in accordance with the contract as agreed.

The policy, organization and procedures necessary to achieve the required standards are described in our Quality Management System.
